

PREPARING YOUR HOME FOR A ROOF INSTALLATION

Roofing is a major construction project. While our experienced crews go the extra mile to protect your home and valuables, please expect a certain amount of noise and vibration as they work. Additionally, please be advised that Easy and Fast Roofing, Inc. cannot be responsible for protecting your family, pets or possessions from the falling debris that occur during a typical roofing demolition and installation.

You can help us to make the installation process as safe as possible by considering:

1. When the material is delivered by the supply company, please inspect and check the color and style. Call Easy and Fast Roofing, Inc. immediately if you think there might be different color or style.
2. Weather can greatly alter our roofing production schedule. Should your project be delayed due to bad weather, we will notify you of schedule changes.
3. On the day of the project, be prepared for great deal of noise. There will be constant hammering.
4. Keep children and pets in a safe area away from the work area!
5. To ensure the safety of your pets, please keep them inside with all doors securely closed. Falling debris could severely injure your animals if they are not properly contained in the home. If possible, take pets to a friend's home since the loud sounds of a re-roof may cause stress in some animals. Our crews will need access into your backyard through gates. Upon the completion of the project, please make sure that all gates are properly closed before allowing your pets to re-enter your yard.
6. As with any major renovation project, a re-roof may cause vibrations inside your home. Make sure that all wall hangings are securely fastened to the wall. If in doubt, remove them for the duration of the project. Loose and breakable items on shelves, bookcases, tables, etc. should also be removed to ensure the wellbeing of your valuables.
7. Remove all items from around the house where roofing debris or bundles of shingles might fall, such as patio or pool furniture, potted plants, lawn ornaments, and gardening equipment. If you have specific concerns about plants that you want to be protected, make sure you point these out to the foreman.
8. On the day of the project, the crew will need full access to your driveway. Please park vehicles away from the house and out of the driveway. Also, the crew will need access to an outdoor electrical outlet and a garden hose.
9. After the completion of your project, the crew will perform a magnetic sweep around the perimeter of your property. If dean-up is not to your satisfaction, please contact Easy and Fast Roofing, Inc. *immediately!*
10. Your satisfaction is our primary concern! After the completion of the project, take a few minutes to walk around the exterior of you home and survey our work. If you have any questions, please call Easy and Fast Roofing, Inc. office and we will be happy to assist you.
